Italy - The Civic Tower of Citta' di Castello under a new light

Located in the main square of Città di Castello, the medieval tower of the Umbrian city has been recently renovated within a comprehensive urban restoration and environmental improvement project promoted by the local municipality. This suggestive tower still retains in its interiors some ancient stone walled coats of arms and a trace of the fresco that the Priors commissioned to Luca Signorelli...

microPARADE: a new world of possibilities

Available with 12, 24 or 36 mid-power LEDs, the brand new microPARADE is an ultra-compact and versatile modular bar ideal for wall grazing effects, owing to its specifically developed modular optics groups. The combination of a new generation of RGBW mid-power LEDs delivers optimal efficacy and reliability beside a richer alternative of intense and bright colour hues. Housing in-built electronics and...

An... illuminating Eklipse

Designed for specific application on windowsills, EKLIPSE is an LED graphic light shaper, which highlights the inner frames or the outer edges of windows, balconies or repeating architectural elements, while designing appealing optical effects on residential, public, historical or artistic building façades. Its newly engineered, extremely

compact, minimal body houses 4 high power LEDs. Its capability...
