HUNGARY_Game day!!

Just today, November 15th, the newly renovated Ferenc Puskás Stadium, an icon among the world stadia now renamed "Puskás Arena", is hosting its inaugural game, Hungary vs Uruguay, a true classic of the Hungarian football golden era in the 50's. With an improved 68.000 capacity, Puskás Arena will become one of the venues of the European Championships in 2020 and, apparently, also the Champions League final location in 2021.

GRIVEN has proudly provided the color and the glitz to this historical building with an army of 120 units of Powershine MK2 S and 208 Corals plus a vast array of Zaphirs, Rubys and Jades for the "Football Museum" attached to the structure. There will be professional photos and a full story in our website and in the specialized media in the next few weeks, as well as a complete story in our next Newsletter. Don't miss it!

U.S.A._MOSAIC captures the night

Symbol of the increasing synergy between the Nordeon Group companies GRIVEN and HESS America, MOSAIC epitomizes stately elegance through crisp detailing and subtle design elements day or night. The column's unique use of illumination creates a dynamic palette of light and shadowing with static or dynamic color-changing LED sources. Available in different heights, the illuminated column features a choice of five precision laser-cut panel designs and is constructed from high-quality materials for superior fit and finish to satisfy even the most demanding needs of pedestrian-scale applications.

Delivering a limitless colour changing spectrum, GRIVEN Jade, either with 9 RGB or 16 RGWB LEDs, backlights MOSAIC's decorative panels from within. The color-changing luminaires feature onboard controls, which may be programmed via an infrared remote controller to utilize onboard sequencing capability or interfaced with external DMX control systems to produce sophisticated scenes.
